

## DockinaPort® » from \$2,795.00

Years of development have led us to produce the most advanced PWC drive on port in the market. The DockinaPort® is designed for both flat and the new deeper stepped bottom hulls. Our design also accommodates the new shorter models right up to the largest 1100lb models. A unique feature of the DockinaPort® is the ability to adjust the balance of the port, side to side, or front to rear. This is a feature not found in any competitive models. Patented design creates the most stable boarding system available.

<b>Pole Mount - 45" (pair)</b>	<b>\$495</b>
<b>Winter Cover</b>	<b>\$450</b>
<b>Quick Disconnect Plate for Belt or Pole Mount</b>	<b>\$70 pr</b>

## DockinaPort® Mounting Options

The DockinaPort® is designed with different mounting options depending on what structure it is being mounted to, and how much the water levels fluctuate during the boating season.

### BELT HINGE MOUNT

Mounting to a **FLOATING DOCK** or where **WATER LEVELS REMAIN CONSTANT**

» The DockinaBox® parallelogram hinges are designed for end mount or side mount applications. The hinges are height adjustable and allow for flex from wakes or the PWC driving onto the DockinaPort®.

### POLE MOUNT (31" & 45")

Mounting to a **FIXED STRUCTURE** or where **WATER LEVELS FLUCTUATE**

» The DockinaBox® pole mounts are designed for end mount or side mount applications. The pole mounts firmly attach and allow the DockinaPort® to slide up and down the post as the water level fluctuates.

### Flexible Mounts

» Belt Hinge

» Quick Disconnect Plate for both Belt Hinge and Pole Mount

» Pole Mount
